

DECENTRALIZED BOOKING

Problem

- ✓ Online travel agencies - middleman **dominating** in booking business
- ✓ Uncontrolled commissions
- ✓ Average **commission** rate – 20-30%

Solution

Blockchain philosophy – eliminate intermediaries from value chains

Hospitality market – right place for blockchain projects

Opportunities

- ✓ Huge market > \$550 bln
- ✓ Middlemen commissions > \$75 bln – can be returned to travelers and hoteliers
- ✓ By 2030 market volume will double and middlemen commissions as well

Project driver

NOMAD.space value

- Lowest transaction cost
- Blockchain platform
- Widest client and hotel base
- Financial infrastructure
- Technical infrastructure
- DAICO – control over funds
- DAO owned by hoteliers
- Honest reviews
- Non-staff hotel

NEW BLOCKCHAIN

Project goal:
Create a global wide blockchain platform on hotel online booking eliminating middleman fees and covering 20% of the hospitality market that will double by 2030 exceeding \$1.1 trillion in volume and thus outperform major rival OTAs.

Success factors

Strong team = Business+IT+Travel

Hoteliers install nodes and deploy NOMAD network – no commissions, no price parity

Payments in traditional currency

M&A on target aggregators and PMS developers to ensure flow of orders from very beginning **M&A**

Conscious choice of a suitable blockchain platform of three tested: EOS, Plasma, Side Chain

Liquidity of NSP tokens ensured via smart-contract MMSC
